Diary - Scrum Simulation

Due: Monday, 16 October 2023, 11:59 PM

At most 7 days after your Scrum Simulation session, submit a new diary entry:

1. Discuss honestly what you learned during the simulation (and mention if you feel you didn't learn well something about Scrum).
2. Do you think that the simulation will help your project succeed? How?
3. Was there something surprising / controversial compared to what you have learned about Scrum previously?
4. Give feedback on the simulation: What was good/what could be improved?

[Edit submission] [Remove submission]

Submission status

Submission status	Submitted for grading
Grading status	Graded
Time remaining	Assignment was submitted 20 days 11 hours early

Feedback

Grade	Passed with distinction
Graded on	Thursday, 19 October 2023, 11:06 PM
Graded by	TR Railio Tom
Feedback comments	— I am kinda speechless, this is by far the best report I have ever seen for this task. Please give it also to your Team members to read, partly because they did not put much effort here and your submission will teach them the most important things with ease and this will help your whole Team the next 6 months.
